

AMERICA'S SECURITY CORPORATION

Capability Statement

America's Security Corporation (ASC) is a small disadvantaged business (SDB) with expertise in Cyber Security, Security Engineering and System Engineering.

Mission: Our mission is to enhance security globally and locally through innovation and excellence.

Special Core Capabilities: We provide Cyber Security and Insider Threat services. We perform IT Security Authorization, using NIST SP 800-37 Revision 1, NIST 800-53 Revision 3, NIST 800-53A Revision 1; ICD 503 and CNSSI 1253.

Our core cyber security services include the following:

- ❑ Compliance and Security Audits
 - NIST Risk Management Framework (RMF) Assessment and Authorization
 - Vulnerability Assessment
 - Forensics Analysis
 - Network Traffic Analysis
 - Penetration Testing
 - FISMA Audit
 - A-123 Audits
- ❑ Cyber Security Training
 - Transitioning DIACAP to RMF
 - ICD 503 RMF for Intelligence Community
 - Certified Authorization Professional (CAP)
 - Certified Information Systems Security Professional (CISSP)
- ❑ Cyber Security Solutions and Services
 - Cross-Domain and Multiple-Domain Strategies
 - Disaster Planning and Recover
 - Perimeter Defense
 - Public Key Infrastructure (PKI) Assessments
 - Security Architectural Engineering
 - Systems Integration
- ❑ Cloud Computing Assessments
 - Virtualization Solutions
 - Software-as-a-Service (SaaS)
 - Platform-as-a-Service (PaaS)
 - Infrastructure-as-a-Service (IaaS)

ASC provides program management, system integration, enterprise architecture management, investment management and capital planning, system security compliance management, records management and compliance; engineering and INFOSEC services to the Department of Defense, federal, state and local governments and commercial clients. ASC's comprehensive array of capabilities has helped our clients harness advances in information technology to meet their business needs. Our core capabilities are highlighted in Table 1, ASC Core Capabilities.

Table 1. ASC's Core Capabilities

Program Management

- Program Planning
- Program Project Reviews
- Financial Management
- Risk Assessments
- Technical Audits
- Schedule Integration

Security Engineering

- Enterprise Architecture
- Requirements Analysis
- SSP Development
- Assessment and Authorization
- Certification and Accreditation
- Independent Verification & Validation

Enterprise IT Management

- Enterprise Architecture
- Security
- Strategic Planning
- Standards
- Quality Assurance/Control
- Configuration Management
- Emerging Technologies
- Enterprise Data Management

Managed Security Services

- Continuous Monitoring
- Vulnerability Assessments
- Audit Review & Analysis
- Penetration Testing
- Risk Assessments
- Incident Detection and Analysis

IT Infrastructure Support

- Distribute Systems
- Network Management
- Enterprise Network and System Management
- Information Systems Security
- Help Desk

Software Development

- Life Cycle
- Client Server System
- Integration/Testing
- Quality Assurance
- Design/Prototyping
- Metrics

ASC Staff: ASC is a small business, combining unparalleled experience, comprehensive capabilities across all industries and business functions, and extensive research to:

- Deliver quality systems which meet or exceed customer expectations when promised and within cost estimates
- Deliver systems that work effectively and efficiently within the current and planned information technology infrastructure
- Deliver systems that are cost-effective to enhance and maintain
- Develop quality systems using an identifiable, measurable, and repeatable processes
- Establish an organizational and project management structure with appropriate levels of authority to ensure that each system or infrastructure project is effectively managed throughout its life cycle

Differentiators: ASC Inc. is a diversified information technology (IT) company, dedicated to providing quality services with a proven track record of integrating talent and IT to deliver cost effective solutions. We are a premier provider of IT, Information Assurance, and Cyber Security services to Federal Government agencies using:

- Mature, Proven, Repeatable Processes
- Extensive Technical Capabilities
- Significant Capacity for Innovation
- Quick, Tailored, Cost-Effective Responses to Requirements
- Highly Flexible and Scalable Staffing Model

Past Performance

- Department of Justice, Drug Enforcement Administration
 - Booz Allen Hamilton (Information Assurance Contract)
 - Apptis (Information Assurance Contract)
- Department of Health and Human Services, National Institute of Health
 - FHI360 (IT Certification and Accreditation)

Payment Methods: Accept purchase or cards
